

NO-ONE UNDERSTANDS CHIMNEY FLASHING LIKE WE DO

COMPLETE CHIMNEY RE-BUILDS

Complete tear down and re-build of the chimney frame around the flue pipe. Install new OSB walls and a underlayment. Install new chimney flashing and cover flashing with underlayment, then wrap chimney with a moisture wrap and install new vinyl siding trim, corners and panels on chimney. Install new shingles to best color match existing roof system. Clean up all trash from project and remove from property.

A new chimney cap will be required for this project. See chimney cap page for pricing.
