## **THE "CROWN" CHIMNEY CAP**

The Crown Cap is Premier Roofing's entry-level chimney cap — a simple, reliable design built to meet essential protection needs while staying budget-friendly. Constructed with a solid, flat metal top and precision-fit sides, the Crown Cap prevents rain, snow, and pests from entering the chimney, ensuring basic protection and improved longevity of the flue.

Some versions include an integrated draft or exhaust fan when required by specialized fireplace or ventilation systems. Each Crown Cap is hand-fabricated and mechanically fastened for a secure fit and dependable performance.

While more economical than architectural chimney caps, the Crown Cap still upholds Premier Roofing's fabrication quality and is backed by a 1-year installation warranty for peace of mind.
