

PREMIER ROOFING®

THE "BIRD CAGE" CHIMNEY CAP

The Bird Cage Cap is designed for homeowners who want exceptional ventilation without sacrificing protection. This cap features a tall, open-volume chamber wrapped in painted 1/2-inch expanded metal, allowing smoke to escape freely while preventing birds, squirrels, raccoons, and debris from entering the flue.

Its signature design includes a sloped metal roof that shields the chimney from rain and snow while promoting excellent airflow. Handcrafted by Keith Carothers using reinforced materials and precise mechanical fastening, the Bird Cage Cap is built to withstand harsh weather conditions and remain structurally solid year after year.

With its clean lines and high-performance design, the Bird Cage Cap is the ideal solution for chimneys that require maximum ventilation and continuous protection from wildlife.
