

PREMIER ROOFING®

THE "ROYAL" CHIMNEY CAP

The Royal Cap is Premier Roofing's top-tier, flagship chimney cap — a handcrafted architectural design engineered for homeowners who want the absolute best in durability, appearance, and performance. Each Royal Cap is fabricated by owner Keith Carothers using premium sheet metal and painted 1/2-inch expanded metal, providing superb airflow while delivering unmatched strength and weather resistance.

Every detail of the Royal Cap is intentional: its raised architectural roof-line improves draft performance, enhances smoke escape, and prevents heat trapping inside the chimney. The expanded metal screening blocks birds, rodents, and debris without restricting ventilation. Each unit is mechanically fastened, sealed, and built to outlast every traditional store-bought or builder-grade chimney cover on the market.

Beyond its performance, the Royal Cap dramatically upgrades curb appeal. The bold profile, precise fabrication lines, and polished finishing make it a standout feature of any home. Backed by Premier Roofing's limited Life-Time Installation Warranty, the Royal Cap represents craftsmanship, precision, and long-term protection at the highest level.
