

# PREMIER ROOFING®

## THE "RIDGE" CHIMNEY CAP

The Ridge Cap is a premium, over-sized chimney cap designed for customers who need maximum coverage and airflow across wide chimney systems. Built with a large sloped metal roof and painted 1/2-inch expanded metal sides, the Ridge Cap delivers superior ventilation while offering a sophisticated architectural look.

Each unit is hand-fabricated and mechanically fastened for long-term stability. Its expanded horizontal footprint helps shield the chimney from rain, snow, animals, and wind-driven debris while providing a clean, streamlined appearance. The sloped roof helps shed water efficiently and reduces staining on masonry surfaces.

Whether used on large stone chimneys, multi-flue systems, or custom-built fireplace structures, the Ridge Cap provides the ideal balance of performance and aesthetics, making it a practical yet visually impressive upgrade.
